EDUCATION

McGill University

Graduation: May 2022

B.S. in Physics and Computer Science. Cumulative GPA: 3.90/4.00

Montreal, Canada

- Teaching Experience: "Algorithm and Data Structures" tutor in Winter 2021.

SKILLS

Programming Languages: C++, Python, C#, C, Java, JavaScript, OCaml, Bash

Graphics & Game Development: Unreal Engine 5, Unity, OpenGL, GLSL Shaders, Blender

Tools: Perforce, Git, CSS, HTML

Languages: English, French (Bilingual)

WORK EXPERIENCE

The Coalition - Microsoft Xbox

May 2021 - August 2021

Software Engineer Intern - Engine Team

Vancouver, Canada

- Built testing and debugging tools for the Unreal Engine 5 physics and core system.
- Profiled new UE5's Chaos and Nanite systems to measure their performances on Xbox and PC.
- Implemented procedural collision volumes and Ragdoll states in cooperation with the Physics Team.

Ubisoft

June 2020 - August 2020

Gameplay Programmer Intern - Unannounced Game

Montreal, Canada

- Designed a buoyancy simulation algorithm in C++. Optimized it to 60 FPS real-time performances.
- Implemented visualization tools to improve testing and debugging workflows.

PERSONAL PROJECTS

Tradescantia Engine 🐉 | C++, OpenGL, GLSL Shaders

- Designed a real-time multi-threaded 3D Game Engine with OpenGL.
- Optimized the engine for the simulation of 5k+ particles, integrated with the Semi Implicit Euler Method 🐉.

Achilles 🐉 | 3D Physics Engine - C++

- Designed a real-time Physics Engine in a pure Entity-Component-System architecture.
- Implemented dynamics, collision detection and response, softbody simulation for ropes and clothes.

Multithreaded Raytracer 🐉 | C++

- Designed a ray-tracing render engine from scratch in C++.
- Accelerated its rendering time using multi-threaded programming.

Meme Popularity Predictor 🐉 | Machine Learning - Python, Tensorflow

- Designed a Convolutional Neural Network model to predict the popularity of a meme with a 65% accuracy.
- Took part in a 10 weeks machine learning bootcamp; implemented Naive Bayes, PCA and SVM models.

GetOut 🐉 | Ubisoft Competition - Unity3D - C#

- Built a Puzzle 3D platformer video game in a team of 8 in 10 weeks.
- Designed and optimized 3Cs, Artificial Intelligence (State Machine) and networking for multiplayer.

LEADERSHIP & VOLUNTEERING

GameDev McGill 🐉 | President (2021-Present), VP Internal (2020-2021), Member (2019-2020)

- Leading a team of 10 executives to organize events for 100+ members of a game development club.
- Organizing McGame Jam, a 48h hackathon uniting 150+ hackers.

Red Cross | Volunteer (June 2021 - Present)

- Emergency responder volunteer. Certified "Emergency First Aid CPR - Level C".
